5. Fire-fighting Measures

Extinguishing media.

Suitable extinguishing media.

Foam. Water spray or fog. Use CO₂, dry chemical, or foam.

Extinguishing media which shall not be used for safety reasons.

Do not use a solid water stream as it may scatter and spread fire.

Special hazards arising from the substance or mixture.

Flash back possible over considerable distance. Vapors may form explosive mixture with air. Most vapors are heavier than air. Vapors may spread along ground and collect in low or confined areas (sewers, basements, tanks). Vapors heavier than air. Development of hazardous combustion gases or vapors possible in the event of fire. Combustion may produce carbon monoxide, carbon dioxide, and irritating or toxic vapors and gases.

Advice for firefighters.

WEAR SELF CONTAINED BREATHING APPARATUS AND FULL PROTECTIVE GEAR.

6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures.

Personal precautions.

Personal precautions. Use personal protective equipment. All equipment used when handling the product must be grounded. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area).

Advice for emergency responders.

Refer to protective measures listed in sections 7 and 8.

Environmental precautions.

Environmental precautions. Local authorities should be advised if significant spillages cannot be contained. Do not allow into any sewer, on the ground or into any body of water.

Methods and materials for containment and cleaning up.

Methods for Containment.

Take up with sand or other noncombustible absorbent material and place into containers for later disposal. Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13). Remove all sources of ignition.

Methods for cleaning up.

No Information

Reference to other sections.

See section 8 for more information.

7. Handling and Storage

Conditions for safe storage, including any incompatibilities.

Advice on safe handling.

Handle in accordance with good industrial hygiene and safety practice. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Vapors are heavier than air and can cause suffocation by reducing oxygen available for breathing. Do not use sparking tools. No smoking. Take precautionary measures against static discharges. Vapors may form explosive mixtures with air.

Hygiene measures.

Do not drink, taste, swallow or ingest this product. Wash thoroughly after handling product. Always wash up before eating, smoking or using toilet facilities.

Storage Conditions.

Keep in properly labeled containers. Keep away from heat and sources of ignition. Keep containers tightly closed in a dry, cool and well-ventilated place. Use spark-proof tools and explosion-proof equipment. Keep away from oxidizing agents and strongly acid or alkaline materials.
