

Introducing Walker's GEL - an expanded selection of gel protection products designed to relieve common foot, ankle, hand and limb ailments.

A variety of advanced gel formulations are utilised to provide the best possible outcomes for your patients - all of which are:

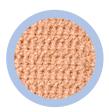

#### **Ribbed Knit**

A fabric weave that is typically stretchy & elastic, allowing it to expand & contract without distorting the shape. The ribbed effect makes the fabric feel a little thicker providing added cushioning.

#### **Mesh Knit**

A fabric weave defined by its lightweight feel & permeable texture.

Unlike most types of fabric, which feature closely woven textures, mesh is woven loosely, resulting in thousands of tiny holes for high breath-ability.
