urea 25 ULTRA

25% urea with CERAMIDES (NP,AP,EOP)

Ceramides are lipids which form a large percentage of the extracellular matrix within the epidermis and stratum corneum. Commonly referred to as the "glue" that bonds skin cells together.

Ceramides play an important role in controlling trans-epidermal water loss and maintaining skin barrier function.

Ceramides are produced naturally by the skin, however with age and with certain skin conditions their levels can become deficient.

Walker's UREA 25 ULTRA has been formulated with a combination of three ceramides (NP,AP & EOP) to compliment the urea and other moisturising ingredients to further enhance the cream's hydrating capabilities and to assist skin barrier and resilience.

Walker's Urea 25 ULTRA – Ingredients:
Water, Urea, Paraffinum liquidum, Glycerin, Stearic Acid, Ceramide NP, Ceramide AP, Ceramide EOP, Chlorestol, Sodium lauroyl lactylate, Phytosphingosine, Triethanolamine, Sodium hydroxymethylglycinate, Carbomer, Xanthan gum, Disodium EDTA

The Walker's range of Specialist Footcare Creams are certified by the Australian Made Campaign Limited Licensee ID Number: 11103
